

National Association of  
Conservation Districts

## LaMoure Co. Soil Conservation Promotes Stewardship Week

**The LaMoure County Soil Conservation District**, in partnership with the National Association of Conservation Districts (NACD), is celebrating the 67<sup>th</sup> Annual Stewardship Week from April 24 – May 1, 2022. This year’s Stewardship Week theme is “Healthy Soil, Healthy Life.”

The LaMoure SCD is a member of NACD, which oversees the annual Stewardship Week program, one of the largest national annual programs that promotes conservation.

“Our ability to produce and access quality food and water depends on the health of our nation’s soils,” **said NACD President Michael Crowder**. “This year’s Stewardship Week represents the continued awareness and recognition of the importance of effective conservation practices to maintain access to our natural resources for future generations.”

The LaMoure Soil Conservation District was formed to assist the people of LaMoure County with implementing conservation programs and promoting efforts that protect and improve natural resources. During Stewardship Week, the LaMoure SCD will be offering free materials and conservation grade trees to local county entities who have requested it.

The LaMoure Soil Conservation District is a vital resource to those interested in expanding awareness surrounding types of soil native to the local area and provide critical information related to soil care, maintenance, best health practices, and erosion protection.

This year’s Stewardship Week resources celebrating “Healthy Soil, Healthy Life” are available for free download on the [NACD Stewardship Week website](#).

For more information, contact Susan Muske, District Manager at 883-5344 Ext. 3 or 320-8724.

### About the National Association of Conservation Districts (NACD)

The National Association of Conservation Districts is the nonprofit organization that represents the nearly 3,000 conservation districts across the United States, their state and territory associations, and the 17,000 men and women who serve on their governing boards. For more than 75 years, local conservation districts have worked with cooperating landowners and managers of private working lands to help them plan and apply effective conservation practices. For more information about NACD, visit [www.nacdnet.org](http://www.nacdnet.org).
